

Profile

I am a web developer with a background in sales. With some friends, I developed a few apps and deployed them on Heroku. I would like to join a team of people in a startup where I can help them build new applications.

Skills

Ruby | Javascript
React | HTML
CSS, SCSS | Bootstrap

Developed

Happy Tours

Connecting people to local breweries

02/2022

- An app for local breweries to schedule their own tours and users to book the tour directly with the brewery.
- Added initial seeds with faker gem.
- Added search bar using bootstrap components and PG Search functionality.
- Written using Ruby on Rails, HTML, SCSS using Mapbox API deployed on Heroku.
- Created with a team of 3 people in 5 days.

TraQ

Emergency Tracking and Response Made Simple

02/2022

- An app for NPOs to create a location to distribute and track supplies during an emergency.
- After reviewing documentation for different geolocation APIs, we decided to go with Mapbox over Google maps due to the simplicity and limited timeframe.
- This app will request for user location at time of use to immediately direct them to the shelter or NPO location closest to them.
- Added a search function on top of Mapbox framework so users can locate the shelters closest to them.
- Written using Ruby on Rails framework, Mapbox API to get the user location, using SCSS for front end and deployed on Heroku.
- Created with a team of 3 people in 9 days.

Professional Experience

Various Japanese Companies (Electronics)

2017 – 2021 | Tokyo, Japan

Shindenkizai Co., Ltd.

- Created monthly marketing emails and managed social media accounts.
- Achieved sales for the yearly target.

Sugatsune Kogyo Co., Ltd.

- Handled the process of exporting company products.
- Conducted final translation checks.

Kawashima Kinzoku Co., Ltd.

- Searched for a local manufacturer in Thailand.
- Made visits to factories for site inspection.
- Developed and managed company Wordpress website.
